

SYED MOIN AHMAD

Full-Stack Laravel Developer

PROFESSIONAL PROFILE

Highly motivated and results-driven Full-Stack Developer with expertise in designing, building, and deploying scalable, high-performance web applications. Specialized in backend engineering using PHP (Laravel) and optimized MySQL database architectures, alongside modern responsive frontend interfaces with JavaScript, jQuery, HTML5, CSS3, and Bootstrap. Experienced in developing custom CMS platforms, real-time messaging services, AI-powered API integrations (ChatGPT & Mistral), automated Google Calendar scheduling, and secure payment workflows (Stripe). Passionate about writing clean, maintainable code and solving complex technical challenges in collaborative environments.

WORK EXPERIENCE

Laravel Developer

01/2024 – Present

Interactive Tech Solutions (ITSOL) – Lahore, Pakistan

- Custom CMS Development:** Architected and maintained a custom Content Management System enabling seamless user creation, content editing, and media workflows.
- User & Role Management:** Engineered a robust authentication and authorization system with fine-grained Role-Based Access Control (RBAC) and permission management.
- Real-Time Communication:** Implemented interactive live-chat functionality leveraging WebSockets/Laravel Echo to enhance user communication and engagement.
- RESTful API Architecture:** Designed and consumed secure RESTful APIs to facilitate smooth data exchange between frontend interfaces and external microservices.
- Third-Party Integrations:** Integrated AI language models (ChatGPT / Mistral AI) for automated content tools, Google Calendar API for scheduling, and Stripe for multi-currency payment processing.
- Performance Optimization:** Boosted application response speeds and throughput by processing resource-heavy background tasks using asynchronous Laravel Queues.
- Database Design & Management:** Designed, indexed, and optimized relational MySQL database schemas for high security, data integrity, and low query execution times.

CORE STRENGTHS

- ✓ Clean & Maintainable Code
- ✓ Scalable Backend Architecture
- ✓ Database Performance Tuning
- ✓ REST API & Microservices
- ✓ Agile Problem Solving

KEY PROJECTS

Sale & Purchase — E-Commerce Platform

Full-featured online marketplace featuring dynamic product catalogs, cart management, checkout workflows, inventory management, and integrated Stripe payment processing.

TekTIME — Project Management Tool

Enterprise collaboration suite with task management, project timeline tracking, real-time activity updates, team role permissions, and productivity analytics.

Website Builder — E-Commerce Page Creator

Dynamic web page builder empowering non-technical users to design, customize, and publish tailor-made e-commerce storefronts.

Ads Management & YouTube Promotion Automation

Marketing platform built to streamline ad campaign execution, YouTube video campaign tracking, audience metrics, and promotional workflows.

Restaurant Management System (POS & Reservations)

End-to-end POS and restaurant solution handling digital menu management, online table reservations, order tracking, and billing invoice generation.
